

Segment 22 CR 510 Tree Farm Parking to Silver Lake Rd via the Red Rd

(Formerly Segment 20), Updated April 2026. **Use Avenza Maps for locating and following the trail. Note: the eastern portion of this segment has been recently rerouted.**

Trail Adopter(s): Eastern portion: Becky Tavernini reteavern@nmu.edu
Western portion: Road walk, no adopter needed

Segment length: Eastern portion, about 3.5 miles
Western portion, about 6.5 miles

Link to [Avenza Maps Online](#) Use Maps # 38 & 39 in the Avenza app. Make sure you have the current updates for Avenza. Always refer to the updated Avenza Maps for the most current NCT mile markers.

Please contact the Marquette Area Chapter at mac@northcountrytrail.org with reports of trail conditions, including blowdowns, washouts or inadequate blazing, or if you have questions on driving directions to the start point.

Many of the backroads have multiple names depending on which map you are using. When known, multiple names for the same road have been indicated in italics within brackets.

On the trail: (all trail descriptions will be westbound, follow in reverse for eastbound)

The segment begins at the parking area at (46.642719, -87.660988) Head south from the parking, you will shortly cross CR 510. The trail traverses alternating area of pines and hardwoods and occasionally joins a snowmobile trail for water crossings. The western end passes through a young jack pine plantation with a nice view of the surrounding hills, followed by an older stand of jack pine. There are some moderate elevation changes but nothing too strenuous. After about 3.5 mile you will reach the Red Rd. Turn left and follow the Red Rd and Silver Lake Rd until this segment ends at (46.639558, -87.791880). Avenza Maps calls this Red Rd Parking.

Driving Directions:

Eastern Trailhead

From the traffic circle near Meijer's in Marquette, take US 41 for 1.6 miles and turn right on [Midway Dr./County Road (CR) 502]. Follow [Midway Dr./CR 502] for .6 mile. Turn right on CR 510 for 11.3 miles. There will be a drive on the right into a tree farm. You can turn in and drive to an open area for parking.

For those who prefer to follow a Google Map, here is the [Driving map US41/Midway Dr to CR 510 parking](#).

Western Trailhead

From the traffic circle in Ishpeming, follow Deer Lake Ave north. At .2 mile curve left, the sign says Marquette County 573. Continue 6 miles and curve left. Continue 2.4 miles and curve left. Continue 1.2 miles and curve left. Depending on which map you use, the road you just traveled may become Deer Lake Rd/CR 573/CR GO/CR CCO/CR CCH/CR AAH/CR AAO, but it is always the main road when there are intersections. After driving 15 miles from the traffic circle in Ishpeming and just after crossing the Dead River, turn left onto Silver Lake Rd for about .8 miles. You will cross Mulligan Creek and the trailhead will be on the right. There is parking a short way down the road to the right. Using the following Google Map is strongly recommended. [Driving map from Ishpeming to western trailhead parking](#).

Camping:

The only portion of Segment 22 where camping is allowed is the trail section between CR 510 and where it connects with the Red Road. This area is primarily a mix of DNR, CFR, and Gwinn Forest Management properties, where dispersed camping is allowed. Please make sure you are on one of these types of public land because some nearby parcels are privately owned. Camping is not allowed anywhere along Red Road, as that land is entirely private. Please be sure to check a mapping app to confirm land ownership before setting up camp. We have careful agreements with landowners along this segment, and it's important that we respect their wishes to maintain a positive relationship.

Water Access:

The road follows several creeks, but the easiest access is at (46.608874, -87.703229) just west of the bridge that crosses Clark Creek. There is also a porta potty at this water access point.

Seasonal Access Information:

An AWD vehicle is best for reaching the eastern trailhead year-round. An AWD is needed for reaching the western trailhead from late spring to early winter. The western trailhead is not reachable via vehicle in the wintertime.
